After hurricane Irma, many roofs have damage and need to be replaced. SFR Services, a licensed, bonded, and insured construction company, has earned recognition for our unique insurance experience. Over the years, we have found most roofing that manufactured after 2004 have been discontinued. This makes repairs impossible and warrants a full roof replacement. Typically, this is covered by your home owner's insurance policy. If your roof is older than 12 years, our industry expertise can make a huge difference on what work gets done at your property. Talk to one of our experts for your peace of mind, as always, there is no obligation for our evaluation.
